

Radio Modes of Emission

<u>Old Designation</u>	<u>New Designation</u>	<u>Description</u>
A0	N0N	Carrier only
A1	A1A	CW (for aural reception)
A1	A1B	CW (for automatic reception)
A2	A2A	MCW (for aural reception)
A2	A2B	MCW (for automatic reception)
A3	A3E	Amplitude modulation broadcasting
A3H	H3E	Single sideband, full carrier telephony.
A3A	R3E	Single sideband, reduced or (variable level) telephony
A3J	J3E	Single sideband, suppressed carrier telephony
A3B	B8E	Independent sideband, two or more channels
A4	A3C	Double sideband, single channel facsimile.
A4A	R3C	Single sideband, reduced or variable level single channel facsimile.....
A5C	C3F	Vestigial sideband, single channel, tv, video.
A7A	R7B	Amplitude modulated, reduced carrier, voice frequency telegraph.
A9B	B9W	Multi channel transmissions, not already covered, eg: combination of telephony & telegraphy
F6	F7B	Four frequency duplex telegraphy
F1	F1B	RTTY -- also FSK morse
P0	P0N	Pulsed carrier without modulation, intended to carry information, eg:- over horizon radar ' woodpecker '
